Brushes for Medical Applications
Laboratory/Scientific Brushes

The Mill-Rose Company

Mill-Rose corporate headquarters and manufacturing facility in Mentor, Ohio

Mill-Rose Laboratories' manufacturing and distribution facility in Mentor, Ohio

The Mill-Rose Company is the largest U.S. manufacturer of twisted-in-wire brushes used in virtually every type of industry throughout the world. Mill-Rose is a multi-division, family-owned organization now in its fourth generation that takes pride in its history of serving satisfied customers. Our company-wide philosophy has always been "The customer is king" and we believe knowledge, integrity and trust are the cornerstone on which solid relationships are built.

Mill-Rose Laboratories

Medical Brushes

Mill-Rose Laboratories was founded in 1977 to serve pulmonary and gastrointestinal medical professionals with cytology sampling brushes. Today, Mill-Rose Laboratories manufactures a complete line of medical brushes, including disposable and reusable cytology brushes; stainless steel wire forms used in snares, forceps and baskets; and instrument cleaning brushes.

Our design and manufacturing experience makes us the ideal partner for solving medical brush requirements for OEM manufacturers and suppliers. Don't hesitate to ask for special diameters, or special shapes and lengths.

On any given day, Mill-Rose engineers are working with medical personnel from around the world developing new proprietary items that help properly diagnose and lead to life-saving treatments.

Laboratory & Scientific Brushes

Mill-Rose is a leading manufacturer of laboratory and scientific brushes. We have a complete selection of high-quality twisted wire brushes for hospital and scientific use. Mill-Rose laboratory and scientific brushes are ideal for cleaning glass or plastic test tubes, centrifuge tubes, flasks, graduated cylinders, beakers, containers, pipette, vials, carboys, and bottles. Our design and manufacturing experience makes us the ideal partner for solving your laboratory and scientific brush requirements. Don't hesitate to ask for special diameters, or special shapes and lengths.

Test Tube Brushes

Mill-Rose test tube brushes feature white bristles with a radial tip or tied, nylon tufted end securely fastened in galvanized wire. These brushes are available in diameters from .5" to 1.375" and lengths from 8" to 11".

Cylinder & Bottle Brushes

Mill-Rose cylinder and bottle brushes are ideal for cleaning bottles, cylinders and large test tubes. These bottle brushes feature a full radial-end tip that promotes effective cleaning and reduces scratching of glass and plasticware. Nylon or black bristles are securely fastened in twisted, galvanized wire with an end loop. Choose from 2" and 2.375" diameters and 13", 16" and 20" lengths.

Centrifuge Brushes

These centrifuge brushes feature a black nylon tuft and are available in a range of diameters from 1"-1.75", .5"-.8125" and .75"-1.5". The centrifuge brush design is ideal for cleaning centrifuge tubes, micro tubes, and a variety of other containers. The overall length is 9" or 12".

Babcock Milk Test Bottle Brush

Mill-Rose Babcock milk test bottle brushes feature long bristles that compress to fit through the narrow bottleneck and then expand for washing the bottle body. Short dense bristles along the stem provide close scrubbing to help remove stubborn residue. These Babcock milk test bottle brushes have a fan tip, 9" overall length with 3.25" brush part and 1.5" large brush diameter and .25" small brush diameter.

More Laboratory & Scientific Brushes

Beaker, Jar & Cylinder Brushes

Mill-Rose beaker, jar and cylinder brushes are ideal for cleaning beakers, jars, and large graduated cylinders. This extra-large beaker brush has a wood handle with tufted end and black bristles. It comes in 13" and 16" lengths and brush diameters from 2.375" to 3.25".

Volumetric Flask Brush

Volumetric flask brushes are made with white bristles seated in galvanized wire with a plastic handle. The curved portion of this volumetric flask brush offers flexibility enabling the brush to reach and clean all parts of the flask. Offered in 12", 14" and 17" lengths. Includes diameters of 1.375", 1.5" and 1.75".

Pipette Brush

Mill-Rose pipette brushes have a twisted galvanized wire with an end loop. This soft white nylon brush is designed specifically for cleaning pipettes. The nylon bristles are mounted in twisted galvanized wire. Two different brush widths are tapered to provide maximum cleaning. The brush is 17" in overall length with a 7.5" bristle section. The diameter is graduated from .25" to .75".

Flask or Nurse Bottle Brush

Mill-Rose flask or nurse bottle brushes feature a black, double tufted end. Brush length 4.5", diameter is 1.5", and the overall length 12".

Beaker Brushes

These Beaker brushes feature an extra-large brush ideal for cleaning beakers. These beaker brushes are spiral wound on to grooved finished hardwood handle. A heavy double-tufted end cleans residue from the bottom of beakers. Available in 12" and 16" lengths with brush diameters including 2.5" and 2.875".
