

Copper Center Brushes

These are our very popular, low-cost, small-diameter brushes for light-duty, high-speed cleaning and polishing operations. They have a high-density bristle fill to produce maximum surface contact and brushing efficiency per thousand rpm with either portable or fixed power tools. Available in standard diameters up to three inches.

(These brushes are designed to operate at 20,000 rpm.)

COPPER CENTER BRUSHES - Nylon

Catalog Number	Diameter	Nylon Size	Arbor Hole	Face Width
